PROFESSIONAL SUMMARY

Machine Learning Engineer with 3+ years building production AI systems. Deep expertise in Python, RAG pipelines, LLM integration, and backend API development. Led deployment of 4 AI-powered products serving 50,000+ users. Strong communicator and collaborative team player with leadership experience across cross-functional teams.

TECHNICAL SKILLS

Languages: Python (Expert), JavaScript, SQL, Java, Bash

AI & ML: RAG Pipelines, FAISS, LangChain, TensorFlow, PyTorch, OpenAI API, Groq, Gemini, Llama 3

Backend & Databases: Node.js, Express.js, Flask, FastAPI, REST APIs, MongoDB, PostgreSQL

Data Engineering: ETL, Pandas, NumPy, Vector Search, Embeddings, Data Preprocessing

Tools: Git, GitHub, Docker, AWS, Power Automate, Postman

PROFESSIONAL EXPERIENCE

Machine Learning Engineer — NovaMind Solutions

San Francisco, CA | Jan 2023 – Present

- Built end-to-end RAG pipeline using FAISS and LLaMA 3, reducing query latency by 40%
- Developed 6 REST APIs in Flask and Node.js serving 50,000+ monthly requests
- Integrated Groq and OpenAI APIs into production chatbots, improving response accuracy by 28%
- Led team of 4 engineers; conducted weekly code reviews and mentored 2 junior developers
- Preprocessed 10M+ record datasets using Pandas and NumPy for model training pipelines

Backend Developer Intern — DataBridge Analytics

Remote | Jun 2022 – Dec 2022

- Built ETL pipelines that reduced data processing time by 60%
- Designed MongoDB schemas and Express.js APIs for 3 internal dashboards
- Implemented vector search with FAISS for a document similarity feature

PROJECTS

Multimodal RAG System — Python, FAISS, CLIP, LLaMA 3

- End-to-end pipeline for PDF Q&A combining text and image embeddings with 92% retrieval accuracy

AI Medical Assistant — Python, Flask, TensorFlow, Gemini API

- Deployed quantized LLaMA 3.1 (8B) medical chatbot handling 1,000+ daily queries

Distributed File System — C++, SHA-1, B-Tree

- Fault-tolerant ring-based DHT with B-Tree indexing; 99.9% uptime in load tests

EDUCATION

B.Sc. Computer Science — Stanford University | 2019 – 2023 | GPA: 3.85
